

Many national rankings reveal that our state is near the bottom for all kinds of aid to our children~education, social services, enrichment opportunities to name a few. We believe that 4Kidzsake is exactly the type of organization that our communities need to develop to impact our children who cannot yet help themselves.

4Kidzsake has contributed funds for team sports uniforms, exam fees for students seeking GED certification, and supplies for public schools. We believe that citizen assistance to our public schools will be critical in the near future as public school vouchers for private schools will seriously deplete tax money formerly directed to our public schools.

We like the flexibility of 4Kidzsake's mission. . .to DIRECTLY impact children. They are willing to serve children in innumerable ways. Child resilience studies reveal that positive, interactive, supportive activities contribute hugely to a child's development. We believe that our donation to 4Kidzsake will directly and positively impact a child's future.
